OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Sockeye Salmon	4/15/97	10	1		<input checked="" type="checkbox"/>
Coho Salmon			9		<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: 6 coho smolt, 3 coho parr and 1 sockeye smolt were observed along with 10 sets of jaw bones which were most likely sockeye. Much of the habitat observed was classic sockeye habitat with upwelling ground water in wide shallow pools.

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
Sockeye		<u>Saw Boxes</u>		<u>Smolt</u>	<input checked="" type="checkbox"/>
Coho			<u>Parr</u>	<u>Smolt</u>	<input checked="" type="checkbox"/>

Provide any clarifying information, including number of fish observed, location of fish survey data, etc. Attach a copy of the fish survey data, if available. Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls.

Comments:

6 Coho smolt, 3 Coho Parr and 1 Sockeye Smolt were observed along with 10 sets of Saw Boxes which were most likely Sockeye. Much of the Habitat observed was classic Sockeye habitat with upwelling groundwater in wide shallow Pools
